

# Get **More** Out of Less

With more than 50 years of refining experience, organizations of every size from around the world have benefited from our personalized services, innovative technologies and environmental commitment. Permitted to receive precious-metal bearing hazardous wastes, our custom solutions serve a wide variety of industries including electronics manufacturing, electroplating, semiconductor and hybrid manufacturing, telecommunications, aircraft and defense industries.

Part of a global, publicly traded organization and regulated under Sarbanes-Oxley, our refinery offers the most transparent and thorough processes for recovering gold, silver, platinum, palladium and copper from any form of production scrap, off-spec and obsolete product lines. Our fully-equipped assay laboratory, staffed with expertly trained chemists and technicians perform all analysis on the premises, maintaining control over the entire process to assure security of your assets and significantly speed up the payment process.
