RECYCLING
SOLUTIONS

Trust The Industry Leader

Our IC division plays a key role in IT recycling. Whether your objective is brand protection or increased revenue, Sims Recycling Solutions has the service for you. Sims Recycling Solutions recovers millions of ICs and passive components each month for the purpose of destruction, precious metals recovery, reuse, and resale; providing our clients a valuable revenue stream and brand protection. Excess inventory can quickly be liquidated and integrated circuit recovery, refurbishing and remarketing provide maximum value for your assets.

With our vast network of domestic and international manufacturers and brokers, we sell between 500,000 and 1,000,000 integrated circuits & passive components each month. To get the most for your assets, value-added services available include lead straightening, re-tinning and specialized packaging.
